

Activity-based schedule (Kanban/User Story Mapping)

Name:	REEMA JIYANI
Community (UN SD goal):	Goal 3: Ensure healthy lives and promote well-being for all at all ages Goal 17: Revitalize the global partnership for sustainable development
Date:	18/05/2021

Project Name	Mental Health Care Application		
Activity	Duration	Start Date	End Date
MVP 1			
[Phase1, Introduction]	[11 days]	[20 May 2021]	[30 May 2021]
[Splash Screen]
Splash page (landing screen) is an introduction page on a website. This page contain logo, current version of system and motivation message or image which can attract new user. In this, I will focus on regular size for android and iPhone. My main focus is make design simple not complicated. Splash screens are meant to engage users by the time app is launched. So I will focus on this point also. And, If the app takes time to start, make it a point to notify users about the progress of launch.			
[Onboarding]
The onboarding process is essentially a series of screens which direct users through an app interface. These onboarding screens have three purposes: Educate the user about the functions and benefits of the app, Allow the user to register their login details, and. This screen will only show to first time user. Do not show to returning user. And, this will only available once. After re-installed it will display again. Setting minimum screen is good (so I decide to set 3-page swipe screen) and a minimal walkthrough is able to establish a good starting point for new users. This way, the user gets to learn about the app without getting bored or slowed down by too much information.			
[Authentication]
Authentication is the process of verifying the identity of an individual. This can be done by Sign in, Sign-up page.			
[Homepage ui]
Here I will set homepage features according to user-friendly design. By this I will try to help community to understand application very easily and take benefit of every features. As you advise professor to keep community positive I will add everyday energizer (daily motivation quotes, exercise) so people can get motivated by this..			
MVP 2			
[Phase2]	[7 days.]	[31 May 2021]	[6 June 2021]

[Broadcast room]

...

...

...

In this I will create broadcast room for community. So they can post their idea about mental care improvement like personal experience, some good article, etc. As well as, Community can share and like other people ideas this way they can help each other.

[Events Page]

Upcoming event with details

MVP 3

[Phase3]

[6 days.]

[7 June 2021]

[13 June 2021]

[Forum]

In this community member can create new forms to ask question about their doubts and get response from other user and admin. As well as, when member get his/her answer they can resolve this question by resolved button.

[Admin App]

...

...

...

In Admin side, admin can add any post and event which are relevant to community member. Moreover, you suggest professor in my application admin can also remove some illegal content from this side so this way I will handle mis/disinformation in this application.
