

Business case

Name:	REEMA JIYANI
Community (UN SD goal):	Goal 3: Ensure healthy lives and promote well-being for all at all ages Goal 17: Revitalize the global partnership for sustainable development
Date:	14/05/2021

Proposed Project	Mental Health Care Application
Date Produced	7 May 2021
Background	For this project user do not need any specific background. Because we know that lives of people living with mental disorders in all countries so through this application we can help this type of community for better future.
Business Need/ Opportunity	These kind of mental health apps are convenient and accessible; they can be a great resource for people who may struggle to access other options. As well as, most mental health apps have measures that allow people to find information and access treatment in a way that is private and secure. Because of mental issues, they impose an enormous global disease burden that leads to premature mortality and affects functioning and quality of life using this application we can improve this situation.
Options	Perform the project (I select this option because at end of my project I will try to deliver minimum viable project using flutter and dart which can be used by community member for basic start.
Cost-Benefit Analysis	

Cost Analysis:

I will choose Flutter platform for my application because budget and time is limited and I need to make a simple application quickly. we can get IOS version and desk version free in this platform. Moreover, some risks on user side like few members are not techno savvy. They do not know how to use this application this can be constraints.

Benefit Analysis: Through this flutter platform I can perform my idea faster and quickly with less time. So I can help many community to overcome the mental health problem.

Recommendation

As for now I do not have any recommendation for my application but when I will work on my project may be I will found some detail that time I will update this section. As for now, one recommendation is that motivating community member to join this application is main target so I can partially or fully fulfill my goals.
